all with the traditional Northstar quality

VERSATILITY is the single word to describe Northstar's VEGA series. Northstar VEGAs, up to and including VEGA 4.8 are the lightweight tender series offering useful storage and seating arrangements on a dry riding hull. VEGA 5.4 and up are the Sport RIB series which is a sports/utility RIB range allowing users to customize their RIBs for fishing and other water sports. Wide beams, extra large deck storage spaces, functional seating are some of the standard features on VEGA Sport RIBs while options like recirculating livewells, bow mounts for trolling motors and T-tops are there to customize them. For fishing aficionados we have created the FISHMASTER version with all the fishing options included. Like all Northstars, VEGAs are made exclusively with CSM (Hypalon) tubes for added durability.
